

## PCSAS APPLICATION – Accredited, Provisional (6/2026)

More specific information begins on p.2. Contact PCSAS Executive Director Laura L. Namy ([Laura.Namy@pcsas.org](mailto:Laura.Namy@pcsas.org)) with questions.

1. Face Page and Outline: This template and related materials are provided to programs that have submitted a Letter of Intent and have been deemed eligible for application to PCSAS and are applying for *Accredited, provisional* status.
2. Body of Application: All application materials must be submitted electronically as PDF files to the secure area of the PCSAS website at [www.pcsas.org](http://www.pcsas.org). Narrative section is limited to 20 pages and should be formatted as: single-spaced; double spacing between paragraphs; minimum of 11-pt. Arial font; minimum of one-inch margins; and pagination. Although not a requirement, it is helpful if programs use the structural outline of PCSAS accreditation criteria (see Application Content Categories at the end of this document) to organize the narrative description of their programs.
3. Appendices: Data since the inception of the program must be provided to document the applicant program's performance in relation to all the various PCSAS criteria. For most applicants, that will be when *Accredited, preliminary* status was awarded.
4. Submission: When ready for submission, the program will be given access to the on-line submission portal of the PCSAS website by the Executive Director. Note that the application should not be submitted as a single unit but rather as natural units and labeled to help reviewers find the materials they are looking for (e.g., Graduate CVs/Equivalent as one unit and, as much as possible, comprised of one file). More detailed instructions for the on-line submission will be given prior to submission
5. Fees: Application Fee: A \$15,000 Application Fee is due at the time of an initial application for PCSAS accreditation. For programs that were previously reviewed by PCSAS and awarded *Accredited, Preliminary* status the Application Fee is \$7,500. An *Accredited, provisional* program must submit a self-study to the RC no later than seven years after the date on which the *Accredited, provisional* stage was granted to begin the process of obtaining *Accredited, Full* status. The Application Fee for *Accredited, full* status is \$15,000 and if granted is in effect for as long as 10 years before reapplication for accreditation is required. The information in these reports may prompt requests for additional information that may lead to a review and possible change of the program's status. The current PCSAS Annual Fee is \$2,750. Invoices are sent in July of each year. (Annual refers to the July 1-June 30 PCSAS fiscal year.)
6. Applicant programs must have signed and returned the PCSAS Applicant Agreement prior to submitting their applications.
7. See the [PCSAS website](#) for more information about application content. Also see the PCSAS Purpose, Organization, Policies, and Procedures Manual (and appendices) on the [Publications and Links](#) page of the website.

Psychological Clinical Science Accreditation System  
Application for Accreditation, Provisional Status

- A. Cover Page:
1. University Information: Name, Address, Phone, Web Address
  2. Responsible University Official: Name, Title, Signature, Date
  3. Department Information: Name, Address, Phone, Web Address
  4. Responsible Departmental Official: Name, Title, E-mail, Signature, Date
  5. Program Information: Name, Address, Phone, Web Address
  6. Responsible Program Official: Name, Title, E-mail, Signature, Date
- B. Abstract: One-page summary of the program's aims and achievements
- C. Faculty Pages:
1. Table of all active program faculty members, their ranks, and roles in program, with list of their current and former graduate student advisees.
  2. For each listed faculty member, a CV/bio-sheet, with education, employment history, honors, grants, and most recent and significant publications. (To simplify collecting these data, grant bio-sheets may serve as a model.)
- D. Body of Application: Not more than 20 pages, single spaced, with double space between paragraphs, minimums of one-inch margins and 11 pt. fonts. The specific content for the body of the application should address how the program meets the Standards of Accreditation that are detailed below.
- E. Appendices: **N.B.** To the extent possible, combine individual files for each appendix (e.g., one file for Graduates' CVs/Equivalentents, one for Faculty Narratives, etc.). Also, please include bookmarks in the files containing CVs, syllabi, and narratives, so that reviewers can find specific information more easily.
1. **Table of Selection Credentials:** For every student who entered and/or graduated from the program since its inception (*without providing names*), list the year of entry, undergrad institution, GPA, and GRE scores. GRE scores should be included only if they are used as part of the admissions process.
  2. **Course Information:** Provide recent syllabi for all core courses and all other major courses that the faculty considers central to the program's curriculum. Please include bookmarks in this file.
  3. **Table Showing Timeline of Required Courses and Major Milestones**
  4. **Distribution of Current Students and Graduates and to Faculty Mentors**
  5. **Current Student Productivity:** Current CVs for all students and graduates, as well as a Data Table containing the mean/median/SD for peer-reviewed publications for students in their first three years of the program and for students in their later years of the program. Please include bookmarks in this file.
  6. **Faculty Narratives of Current Students:** The faculty should provide a written narrative for each current student. This should elaborate on the student's CVs, describing an individual's performance in the program in sufficient detail to allow reviewers to assess the proximal training outcomes related to research and application training. The name of the primary mentor(s) should be included. Please include bookmarks in this file.

7. **Faculty Narratives of Graduates:** If the programs have students who completed the program, the faculty should provide a written narrative for each graduate. This should elaborate on the graduates' CVs, describing an individual's career path and involvement in clinical science in sufficient detail to allow reviewers to assess the training outcomes. The name of the primary mentor(s) should be included. Please include bookmarks in this file.
  8. **Internship Placements:** For any students who have progressed to this stage in the program, provide information regarding the placement of the student.
  9. **Internship Letters:** If the program has students who have completed internships, provide the end-of-year letters for any interns from internship director(s) over the last two years. At the beginning of the Appendix (and/or in the body of the self-study), please provide a brief summary of internship directors' final evaluations of their graduates' clinical skills that focuses on the percentage of grads who received favorable evaluations and a brief description of the issues for any grads who did not receive favorable evaluations. Identifying information for each student can be removed from the internship letters before they are submitted.
  10. **Student Support:** Mechanism of support for all students currently in the program
  11. **Table Showing Time to Complete and Attrition Data** for any graduating classes.
  12. **Program Handbook**
  13. **Department Graduate Handbook**
  14. **Department Clinic and/or External Practicum Policies and Procedures Documents:** These or other information should include a discussion of external practicum sites, detailing how they are chosen (such as how the program determines that each is consistent with the program's training model), the nature of the relationship between the program and the practicum sites, and how frequently each site is used.
  15. **Other Information Deemed Helpful by Program**
- F. **Application Fee:** A \$15,000 Application Fee is due at the time of an initial application for PCSAS accreditation. For programs that were reviewed and awarded *Accredited, Preliminary* status the Application Fee is \$7,500. Payment can be made by check or through a direct bank deposit.

Checks should be sent to:

Laura L. Namy, Executive Director  
Psychological Clinical Science Accreditation System (PCSAS)  
818 18<sup>th</sup> St. NW  
Suite 810 – 1237  
Washington, DC 20006  
771-241-5099

A program may join the Founders' Circle at any time, including after having paid the application fee or after receiving accreditation. The application fee then will be counted toward their subsequent pledge to the

Founders' Circle. We also welcome renewing of Founders' Circle memberships by accredited programs applying for renewal.

Submission Process: The application process is handled electronically. Programs must post their full applications and supporting materials, including all appendices, on the PCSAS Website as PDF files, making these materials accessible to all PCSAS Reviewers. Note that files are listed alphabetically on the reviewers' portal. We encourage programs to label units as A, B, C... followed by description (e.g., A-Graduates' CVs/Equivalents.) We also ask that, as much as possible, these units be comprised of one file (e.g., individual CVs combined into one PDF). Prior to this, each applicant, after being deemed eligible to apply, will ask for and be assigned an ID and password by the Executive Director. These credentials provide access to the secure applicant portal of the PCSAS Website and permit the applicant to upload application materials. New material may be added to the application, but once marked completed by the program, only the PCSAS Executive Director can modify or delete the uploaded material. Posted application material will remain accessible on the Website *at least* one month after being reviewed by the PCSAS Review Committee; then it will be archived and cannot be altered. Applicants typically receive official notification of the Review Committee's evaluation and accreditation decision within a month after the committee's review.

**General Accreditation Standards:** The Review Committee (RC) evaluates applications from programs that explicitly claim to fit within the narrowly defined scope of PCSAS accreditation and to satisfy PCSAS's standards. Accordingly, the RC's task essentially is one of evaluating each program's integrity and quality. Applying the principle of "truth in advertising" as its benchmark, the RC rigorously examines the evidence from each program's application materials and its site visit report to assess how well the program lives up to its claims and to PCSAS's standards. The RC makes qualitative evaluations of each program in:

- a) Conceptual foundations: To be eligible for review, each applicant program necessarily will have endorsed the epistemology, mission, goals, and domain that define PCSAS accreditation. A hallmark of PCSAS accreditation is its flexibility; programs are given leeway to develop their own distinctive and innovative approaches to translating these abstract principles into practical, effective, real-world doctoral programs, because PCSAS believes that the field and the public benefit from variation in how clinical science training is accomplished. This variability may reflect not only local resources and opportunities, but also efforts to move the field forward with well-conceived training innovations. A second hallmark of PCSAS accreditation is the integrated and bidirectionally influential nature of training experiences in research and application. Research (e.g., the problems studied, the measures selected) should be informed by experience gleaned from clinical settings, and clinical application should be informed by research findings (e.g., the treatments selected, the mediators and moderators that should be considered, the importance of evaluation of outcomes and mediating processes). A third hallmark is a demonstrated commitment to promoting clinical science for all people in both research and application; the consideration of all people is crucial given the multicultural world in which we live and the ways in which mental and physical health may be similar or different across different people.
- b) Design and resources: The RC examines the quality, logic, soundness, and coherence of each program's overall operation: its stability; educational plan and pedagogical approach; content and curriculum; administration; and availability and use of resources. The RC evaluates how effectively the program's design and resources are channeled toward realizing the program's goals.
- c) Quality of the science training: The RC evaluates the overall quality of the scientific content, methods, and products of the program's doctoral training and education (i.e., how well the program embodies and promotes the very best, cutting-edge science of the discipline).
- d) Quality of the application training: The Review Committee evaluates the extent to which clinical training is based on science/application integration that prepares program graduates to function as independent providers of clinical services and assume responsibility for patient care by making clinical decisions based on the best available scientific evidence.
- e) Quality improvement: The Review Committee examines the program's investment in continuous quality improvement to determine on-going critical self-examination; openness to feedback; flexibility and innovation; monitoring of program results; and engagement in strategic planning as the field changes in response to the dynamic mental health care environment. The Review Committee expects

each program to monitor its design, operations, and outcomes, and to use these data to pursue excellence and strategically plan for the future.

- f) Curriculum and related program responsibilities: PCSAS accreditation requires that training programs demonstrate that their students have the necessary breadth and depth of knowledge and training experiences to engage in high-quality clinical science scholarship and clinical applications. Programs must clearly articulate their training goals; present a coherent training plan by which students will obtain the necessary breadth and depth of knowledge and experience (e.g., courses, workshops, practica, laboratory rotations); and describe the ways that they ensure that students have achieved these goals. In addition, programs must ensure that ethical standards and consideration of all people are reflected in training for scholarship and clinical application, and programs must attend to, assess, and demonstrate appropriate program climate, as described below.

**Ethics**: PCSAS accreditation requires that programs provide training in relevant codes of ethical behavior and legal and regulatory requirements for scholarship, research, and clinical application, including those nationally recognized professional ethics codes pertinent to psychological clinical science. Clinical science training programs must ensure that ethical standards are integrated into all major aspects of clinical science training, including didactic experiences, applied training, and research. Such integration should promote the production and application of clinical science that is fair and compassionate, reflecting the fundamental principle of beneficence by promoting the well-being of clients, research participants, and colleagues.

**Consideration of All People**: PCSAS accreditation requires that programs demonstrate a commitment to training students with consideration of the multicultural world in which we live. First, programs must attend to the ways in which mental and physical health may be similar or different across different people, especially in the training of students for research and clinical practice. Second, recognition of the variety of multicultural considerations present in the human population should be incorporated into the scholarly content of instruction and program requirements (e.g., research and application training; coursework/experiences, presentations, and milestones, etc.), as well as in the research that is conducted and the client populations that are served. We recognize that there are a wide range of local, state, and federal laws and regulations that may supersede this standard or influence how it is met, and we ask that applicant programs include relevant information about this in their self-study.

**Program Climate**. PCSAS accreditation requires that the program operates in a climate that is welcoming, supportive, and respectful of students, faculty and staff. The climate should be assessed periodically by the program, and the results should inform the development of improvement plans when appropriate and feasible. There must be clear policies for presenting and resolving differences and grievances that may involve faculty, students, or staff.

- g) Outcomes: The RC's evaluations place the greatest weight on each program's record of success: To what extent do the activities and accomplishments of a program's faculty, students, and graduates - especially its graduates from the last ten years - exemplify the kinds of outcomes one expects of programs that successfully educate high-quality psychological clinical scientists? Included here are graduates' ongoing contributions to clinical science in terms of new research and broad dissemination of science-based practice.

For each applicant program, the RC examines, integrates, and evaluates all the evidence across these areas and on the basis of its judgment about conformance to these criteria decides whether the program deserves to be awarded the distinctive recognition of PCSAS accreditation.
